Dear Enzo Homes

I refer to our conversation this morning during which you showed a clear disregard for the lives and safety of Glynneath residents.

I also refer you to the following information and eyewitness report of potential toxic waste previously dumped at the Heol y Glyn site that is found on the following youtube video.

<https://www.youtube.com/watch?v=uugKZC7N7Cs>

and the objection submitted to NPTC Planning in March 2020 by the same resident. A summary and text for this eyewitness report and information appears below.

Resident testimony:: *"The back of the house including my garden overlooks the tip as I am on top of Bryhyfryd Hill. I get up several times in the night to use the toilet. I have seen a number of lorries dumping in the pitch dark, also at one time with Cuddy and company they kept a machine over there, by day the Cuddy worker would turn up and unbury everything [meaning they would dig up the top of the previous day's hole just above what they had dumped the previous day] I (Dai Richards am also witness to this type of activity, I cycle regularly down the Banwen Rd and I used to stop and watch the Cuddy' vehicles at work]. 'I've also been over there (to the proposed Enzo site) early in the morning and seen large metallic barrels containing what I believe to be asbestos, I am familiar with asbestos and I have seen broken bits pushed down into the ground . The barrels also contained chemicals and when the Cuddy machine driver turned up at 8.00am in the morning they were pushed into the ground. There were lorries during the day which were bringing stuff from I don't know where but they were burying all the waste. (I asked this resident how far away he was from the barrels?) He replied. I kicked them and they were full, they were not empty.*

--

The purpose of this email is to request information from you to identify if the Neath Port Talbot Council or Natural Resources Wales,(both of whom have received this information) have shared this information with your company?

We note that you have been meeting with Glynneath Councillor Simon Knoyle on site who is aware of this information, likewise the planning officers Nicola Lake and Steve Ball of NPTC.

I also note that you continually reference your right to take material off the site through a NRW licence despite the planning conditions disallowing this.

We also ask this same question to the Neath Port Talbot Council and Natural Resources Wales both of whom are copied to this email, namely.

Have you shared this information with Enzo Homes ?

I look forward to your reply in due course

regards

David Richards (East Glynneath - Residents Against Contamination)
