Dear Glynneath Town Council,

Please could you discuss the following two Facebook posts in a full council meeting at your earliest convenience. The posts made by Councillor Simon Knoyle show contradictory statements in relation to the Heol y Glyn Development. In the bottom image is an email received by Cllr Knoyle from the planning department, it shows that he has met the applicant and planning department on site and has been made aware of, and is in agreement with the planning department that the spoil heap is removed from the site without testing.

Councillor Knoyle posted this on facebook on 16/10/2020. These plans were all about removing the requirement for testing the spoil heap and they then bypassed the committee process and were passed by the planning department in March 2021. In today's statement, Cllr Knoyle states that he does not support the removal of soil from the site without additional testing. I believe these statements to be contradictory and today's statement is complete nonsense because Cllr Knoyle is aware that the developer can do what he wants with the spoil heap because he has helped usher through a planning application that removes the requirement for testing, this can be seen in the lower image. It also should be noted that if you refer to the planning meeting dated 8/9/2020 which can be found on-line Cllr Knoyle states that he is aware the Enzo intends to spread the spoil heap around. This means that not all the spoil heap will be taken away, some will be 'cut and filled' as Councillor Knoyle states to fill in the stream next to peoples houses. Quite simply he is aware that the land is contaminated, he is aware that the developer has failed to provide a human health risk assessment in accordance with the contaminated land policies of the council. He is more than happy for toxic waste to be moved next to the houses of the people he is supposed to represent. The spoil heap has already tested as contaminated and if people die from this toxic waste then Glynneath Town Council will have breached the 2007 Corporate Manslaughter and Homicide Act and that makes you all collectively guilty of manslaughter. Councillor Knoyle's post today is not about future testing, its about the testing that has been done already that is currently on the top level of the soil and has been moved towards Lower Brynhyfryd and Woodland Park. if you look closely at the testing results you can see its been tampered with and is almost certainly a lot worse than it is. If you watch this video about planning department corruption in relation to the site, you'll note that I predicted which houses would be flooded and that Enzo would break the conditions. The planning department at NPTCBC are blatantly corrupt and Simon Knoyle has been supporting their actions.

If you as a council keep looking the other way while my family and other families in this area are in danger of being poisoned then you only have yourselves to blame when the time comes for making public officials accountable because failure to act is not an excuse.

regards - David Richards, Rugby Relics Ltd

Dear Mr Richards,

Please remove me from the recipient list of this and all future correspondence between you and Glynneath Town Council.

I do not wish to be included in any discussions pertaining to Glynneath, the Town Council or any other connected matter other than those I have initiated with Rugby Relics in relation to my personal data under the Data Protection Act.

Any further unwarranted and unsolicited communication from yourself will be deemed to be harassment and will be reported to the Police as such.

Sincerely,

Joanna van Tonder

Dear Ms van Tonder,

I refer to my previous communication at which point I urge you to do so as well. Please note that I have pointed you in the direction of the Public Interest Disclosure Act. I would suggest that you report the offences I have indicated that you have supported in your role as clerk of the Glynneath Town Council. If you can then show me confirmation privately that you have done so, I will remove you from my outgoing mails. Until then I will allow you to witness the mess you've left behind at GTC. I'm happy for you to report me to the police, I would ask that if you do report me to the police you include a copy of this email for their records, I will of course retain a copy myself. From my standpoint I welcome any and every opportunity to highlight in public the disregard that the Glynneath Town Council shows for the lives of my family and the families in this part of Glynneath, I trust this email finds you well.

regards David Richards, Rugby Relics Ltd, World Rugby Museum Ltd and the East Glynneath Residents Against Contamination group.

PS - I will welcome any approach by Glynneath Town Councillors and/or staff about the points raised in my communications.
